

Report on the 4th edition of AgeingFit in Nice | January 28th & 29th, 2020

With a successful fourth edition in Nice, AgeingFit confirms its position of the European event fostering innovation in the healthy ageing sector

The fourth edition of AgeingFit gathered 500 attendees (healthy ageing companies, retirement and care homes, hospitals healthcare system payers, research institutes, associations, clusters and investors) from 25 countries in Nice at the “Palais des Congrès Nice Acropolis” on January 28th and 29th. 50 exhibitors and 75 international speakers were present at the event. i-PROGNOSIS, a personalized Game Suite for Parkinson’s Disease targeting intelligent early detection and intervention, is the winner of the Innovation Pitches.

Key numbers of the 4th edition:

500+ delegates
25+ countries represented
700+ meetings generated
16 conferences
4 hosted events
75 international speakers
50 exhibitors
15 projects represented during the Pitch Sessions
250,000+ impressions on Twitter with #AgeingFit

Respond to the recent challenges related to demographic aging

Since 2017, Eurasanté, FRANCE SILVER ÉCO, Eurobiomed and Clubster NHL organised AgeingFit, the European event to boost innovation partnerships and promote today’s innovative products and services for the senior care market, to better answer the needs of elderly people.

AgeingFit 2020 gathered 500 attendees all involved in the innovation cycle from research to market, along with the key players in regulation and evaluation with the objectives to identify tomorrow’s market needs.

This fourth edition took place in Nice, at the heart of a rich and innovative ecosystem for the development of this sector. The South Region and the Nice Côte d’Azur Metropolis are attractive for the Silver Economy and Health. They boost strong expertise in technologies (software, IoT...), structuring projects, pilot care institutes. The senior population comes to Provence in search of products and services related to healthy ageing (leisure, housing...) and the area is also a great tourist attraction. Over recent years, regional initiatives have been launched in order to identify and gather the various players with the aim of anticipating the expected growth of this new economy. Today the

South Region is a key player in the Silver Economy, with a rich, diverse and innovative ecosystem that contributes to the development and expansion of a sector, benefiting from a significant senior population and mild, sunny climate.

During these two days, key players of the sector were gathered to present the latest innovations dedicated to improving the everyday lives of ageing people and participants had access to a conference programme designed to address the main issues of the healthy ageing sector and the senior care market.

i-PROGNOSIS elected the most innovative project in Europe

Among the applications, the 15 selected pitches were divided into 4 categories such as prevention, social & managerial innovation, digital solutions and assistive devices.

i-PROGNOSIS

The winner is i-PROGNOSIS, a consortium which includes 11 partners from 6 countries, all members of the European Union, namely, Greece, Belgium, Germany, Portugal, Sweden and United Kingdom. i-PROGNOSIS is a personalized Game Suite for Parkinson's Disease targeting intelligent early detection and intervention.

The cardinal objective of i-PROGNOSIS is the development of an ICT-based behavioral analysis approach for capturing, as early as possible, the PD symptoms appearance, and the application of ICT-based interventions countering identified risks. To achieve this, awareness initiatives are employed, resulting in i-PROGNOSIS community, targeting > 2200 older individuals, in order to unobtrusively sense large scale behavioral data from its members, acquired from their natural use of mobile devices (smartphone/smartwatch).

By involving an expert network of excellence from all relevant stakeholders, i-PROGNOSIS supports all links of the complex value chain entailed from "concept to market reality" in active and healthy ageing solutions, showing a clear dynamic to meet the specific needs in the global race for innovation in active ageing.

www.i-prognosis.eu

"Participating in the Innovation Pitches at AgeingFit 2020, gave me the opportunity to share the main innovative solutions of the i-PROGNOSIS ecosystem based on early Parkinson's Disease symptoms detection and early intervention in older adult's everyday life, and at the same time, allowed me to get in touch with potential business, research and financial partners from healthy ageing sector across Europe and beyond. Being the first European business event dedicated to innovation in Silver Economy and Health, the i-PROGNOSIS Consortium is truly honored to win the AgeingFit Award as the most innovative project, and especially because was given by a world-renowned prestigious multidisciplinary panel of experts!"

An increased number of start-ups in the sector

The 4th edition of AgeingFit confirmed a trend: an increase in the number of start-ups wanting to invest in this sector. This year, many technological innovations were presented, in particular to act on issues related to:

- **The fight against social isolation by creating a bond between individuals** with **Famileo**: Famileo is the link between the residents, their family and your team. The platform allows residences to communicate with families about the everyday life in the residence and to edit a newsletter in 15'. The family app transforms digital messages into a newspaper to help strengthening the bond between your residents & their loved ones.
- **The stimulation of cognitive functions**, with the **i-PROGNOSIS** consortium (more information above).
- **The continuous monitoring of the patient**, with the **Medclinik** project: MedClinik creates mobile and digital solutions to connect patients to their health, treatment, healthcare providers and journey.

New technological solutions (applications, medical devices) for better health prevention through sport and rehabilitation, and for home care, are emerging:

- **Kiplin** uses the levers of gamification and collective strength to deliver engaging PA connected programs.
- **DigiRehab** reduces the need for home care physical exercise increases elderly's ability to master everyday life and can reduce the need for home care.
- **STENDO**[®] is a pulsatile cardio-synchronized device that combines two approaches based on localized tissue mobilization and overall circulatory stimulation.
- **Movendo technology**: The company designs and produces innovative and intuitive robotic technology for clinical treatment and evaluation in Orthopedics, Neurology, Geriatrics, Sports and Pediatrics.
- **Ted Orthopedics** creates the next generation rehabilitation: a knee rehab assistant that allows patients to perform rehab exercises at home while being supervised by their medical team.
- **Spinova** is a managerial innovation with a constructivist approach to project management supported by cognitive control.
- **Ezygain** has developed ema[®], a connected device for rehabilitation of walking abilities adapted to fragile patients (elderly, people with neurodegenerative diseases...).

Support services for keeping elderly people at home are expanding:

- **Unaide** develops a global solution combining human help and technology for homecare support to people weakened by age or disability.
- **Les Ailes Des Anges** offers a service at home to replace family caregivers at night.
